RECOMMENDATIONS  
FOR THE WORKPLACE**

# **PUBLIC FACILITIES AND CHURCH**

**BEST PRACTICES FOR REOPENING  
DURING THE COVID-19 PANDEMIC**  
IN ACCORDANCE WITH CDC, DHS, AND WEDC RECOMMENDATIONS

**CITY OF JANESVILLE**  
*Wisconsin's Park Place*

# GENERAL GUIDELINES

---

## PROTECT EMPLOYEES

- Have conversations with employees if they express concerns. Some people may be at higher risk of severe illness. This includes older adults and people of any age with serious underlying medical conditions. In workplaces where it is not possible to eliminate face-to-face contact, assign higher-risk employees work tasks that allow them to maintain a six-foot distance from others.
- It is critically important that all employees assume personal responsibility for reducing the spread of respiratory viruses by not reporting to work when ill, **including if they only have mild symptoms that would not normally cause them to miss work.** Employers should reinforce the message that during the current pandemic, the usual tendency for staff to “push-through” and come to work when mildly ill is not acceptable.
- If an employee is sick with no COVID-like symptoms or confirmed exposure to COVID-19, then the employee may return to work after three consecutive days (72 hours) without a fever and the use of a fever-reducing medications and improvement in respiratory symptoms.
- If an employee is sick with a suspected or confirmed exposure to a COVID-19 patient, then the employee should seek a COVID-19 test. If the test results are negative, then the employee may return to work after three consecutive days (72 hours) without a fever and the use of fever-reducing medications and improvement in respiratory symptoms and at least seven days have passed since symptoms first appeared.
- If an employee is sick with a suspected or confirmed exposure to a COVID-19 patient, then the employee will be quarantined for 14 days.
- If a member of your household has traveled domestically or internationally and is symptomatic, then the employee will be quarantined for 14 days even if the employee is asymptomatic.
- If the employee has a member of their household who meets symptom criteria related to COVID-19, then the sick member of the household should seek a COVID-19 test and the employee will not be able to work until one of the following is met:
  - If the sick family member’s COVID-19 test result is negative, then the employee will return to work immediately.
  - If the sick family member’s COVID-19 test result is positive, then the employee will not return to work for at least 14 days.
- Self-monitoring identifies illness early and encourages self-isolation at home to reduce the potential of transmission to co-workers and other visitors to the business. Monitoring should include temperature monitoring and query for symptoms of COVID-19-like illness which include any of the following:
  - Measured temperature greater than 100.0°F (37.8°C) or subjective fever (non-oral thermometer preferred)
  - New or worsening cough
  - New or worsening shortness of breath
  - Sore throat
  - Myalgia (sore muscles)
- Screening employees is recommended for businesses, including temperature checks. If temperature checks are performed, employees taking temperatures should take precautions. The most protective methods involve maintaining a distance of six feet from others and/or use of physical barriers to minimize close contact with employees. If employee screens are performed, follow CDC guidelines.
- Employees who develop symptoms while at work should be instructed to notify their direct supervisor, limit exposure to others, and leave work for the day.
- Provide appropriate personal protective equipment (PPE) and supplies for cleaning and disinfecting workspaces.
  - The CDC recommends wearing cloth face coverings in public, especially in areas of community transmission. A cloth face covering does not protect the wearer from viruses, but it may prevent the spread of viruses from the wearer to other people. Face coverings are not PPE and are not appropriate where masks and respirators are required.
  - Train workers who need to use PPE on how to properly apply, use/wear it, and remove correctly. Training material should be easy to understand and available in the appropriate language.
  - Employees should continue to follow their routine policies and procedures for PPE that they would ordinarily use for job tasks.
  - PPE for workers will vary by work task and the types of exposures workers have on the job.
  - Gloves can be a source of contamination if they are not removed properly. Without training, gloves may pose a greater risk of contamination than not wearing. Use of gloves is not always recommended for every industry or job task. Wash hands immediately after removing gloves.

# GENERAL GUIDELINES (continued)

---

## INFORM AND EDUCATE WORKERS AND CUSTOMERS

- Place posters at your business where employees and customers are likely to see them. The CDC has printable resources available.
- Post signage on the front door to let customers know about changes to your policies and instruct them to stay away if they are experiencing COVID-19-like symptoms.
- Provide regular updates to let employees and customers know what they can expect.

## KEEP YOUR BUSINESS SAFE AND SANITARY

- Wash your hands with soap and water for at least 20 seconds.
- Provide soap and water in the workplace. Consider scheduling hand washing breaks so employees can wash their hands with soap and water for at least 20 seconds.
- Provide tissues and no-touch trash receptacles.
- Use hand sanitizer that contains at least 60 percent alcohol if soap and water are not available. Place hand sanitizer in multiple locations to encourage good hand hygiene practices.
- Maintaining social distancing is one of the most important ways to reduce the risk of infection. Physical space should be increased between employees and customers to maintain at least six-foot distance at all times.
  - Consider options to increase physical space between employees and customers, such as opening a drive-through, erecting partitions, and marking floors to guide spacing at least six feet apart.
  - Implement touchless payment options to minimize handling of cash, credit cards and mobile or electronic devices when possible.
  - Deliver products through curbside pick-up or delivery.
  - Decrease footprint.
  - Discourage workers from sharing phones, desks, offices, and other work tools and equipment if possible. Instruct employees to sanitize shared workplace items before and after each use.

## KEEP YOUR BUSINESS SAFE AND SANITARY (continued)

- Sanitize your business to limit the spread of virus to your employees and customers. Minimize exposure by involving as few employees in this process as possible.
  - Clean and disinfect all areas. Give special attention to tools, workstations, restrooms, food service areas, phones, computers, and other electronics.
  - Disinfect common and high traffic areas such as door handles, desks, light switches, and faucets.
  - Employers must ensure workers are trained on the hazards of the cleaning chemicals used in the workplace. Never mix household bleach with ammonia or any other cleaner. Always wear gloves appropriate for the chemicals being used.
  - Increase fresh air intake of the HVAC system. Replace HVAC air filters following the manufacturer's guidance. Businesses should consult with HVAC professionals when considering ventilation changes to reduce the risk of COVID-19.
  - Ensure that all water systems and features are safe to use.

Please review [Rock County Reopening Phased Plan](#) for specific guidance on the occupancy capacity of businesses.

# PUBLIC FACILITY AND CHURCH RECOMMENDATIONS

---

## EMPLOYEE HEALTH AND HYGIENE

- Require employees to wear a cloth mask.
- Employees who have a fever or other symptoms of COVID-19 will not be allowed to work.
- Maintain an adequate supply of paper goods, soap, and hand sanitizer to allow proper hand hygiene among employees.
- Provide tissues for proper cough/sneeze etiquette and no-touch disposal receptacles.
- Utilize disposable instead of reusable items whenever possible. Increase trash pickup frequency to accommodate extra waste.

## CLEAN AND DISINFECT

- High customer contact areas such as doorknobs, buttons, touch screens, and stair rails should be cleaned every two hours or after each use if feasible.
- Bathrooms should be sanitized frequently.
- Disinfecting wipes should not be used to wipe more than one surface. Use one wipe per item or area.
- Guest touch locations such as kiosks or interactive displays should have disinfectant wipes provided nearby.
- If possible, consider disabling kiosks and interactive displays and providing storyboards, video screens, or additional audiovisual information.

## SOCIAL DISTANCING

- Occupant capacity should be reduced to ensure adequate social distancing, if at all possible. Please review the [Assembly Use Occupant Load map](#) for guidance.
- Please review the [Rock County Reopening Phased Plan](#) for specific guidance on churches.
- Eliminate unnecessary physical contact between staff and visitors, and maintain social distancing with a six-foot distance between individuals whenever possible.
- Offer cashless and contactless transactions whenever possible.
- When exchanging paper and coin money, do not touch your face afterward. Ask customers to place cash on the counter rather than directly into your hand. Place money on the counter (not in hand) when providing change back to customers. Clean the counter after each customer at checkout.
- Add clear plastic barrier protection at the entrance or circulation/service desk with a pass-through opening to exchange items as necessary.

## SOCIAL DISTANCING (CONTINUED)

- Mark indoor corridors with directional tape to encourage one-way traffic flow and minimize interactions.
- Instruct visitors to maintain social distancing for the duration of their visit.
- Common-use areas (e.g. lounge areas, locker rooms, courtesy food and beverage bars, and child play areas) should be closed if it is not possible to ensure proper social distancing.
- When possible, use physical barriers to discourage touching of displays, windows, etc.
